

Bluon TdX 20

THE ONLY ENERGY EFFICIENT R-22 REPLACEMENT

What's Happening?

The majority of all HVAC equipment continues to run using R-22. The phaseout of R-22 is nearly complete. R-22 is becoming difficult to obtain and extremely expensive. Translation: your costs are about to skyrocket.

What are the Dangers?

Without your input, your HVAC contractor will likely use a cheap, inefficient replacement for R-22. Substantially increasing your electricity consumption and decreasing your cooling capacity. Don't let your contractor decide.

Bluon is the ONLY Solution

ENERGY EFFICIENT BLUON TDX 20 (R-458A), CONTRACTOR SUPPORT, AND TURNKEY INSTALLATION PROGRAMS

For Repairs & Maintenance

Don't let your contractors install a less-efficient replacement.

Mandate the use of TdX 20 as your R-22 Replacement.
